

## Custom Fabric

Custom Fabric is just one of many digital interior solutions that allow unique creations for a range of environments. Unlike conventional fabric printing methods such as screen or tumble-printing, Custom Fabric is ready for immediate output straight from a digital file.

Since perfecting the art of printing high-definition digital graphics onto soft fabric, this digital process has inspired some pretty wild creations. It is ideal for promotional items and low to medium wear applications.

Imagine being able to take a photograph of absolutely anything and have it printed onto suits, drapes, screens, table runners or lamp shades... well, as crazy as it may sound, people are doing it.
